#I2We20

We need to grow from `I` to `We` in 2020

Note:

💡 Idea

I came up with this idea when I realized:

> The globally **failing *economic*, *political* and *social institutions*** induce bottom-up collaborations, because fixing our problems from above **does not provide lasting solutions** to our needs anymore.

🌳 Permaculture

The *"science of nature"* reveals the patterns for any kind of sustainable system development.

> It is time to apply *nature's ethics* (**people care**, **earth care** and **fair-share**) to have effective IT solutions available to every **independent collaborative community** on the planet.

🌐 What is unresolved

... is the **efficient allocation of resources**, or intra-community resource (a source of supply, support, or aid, especially one that can be readily drawn upon when needed.) management, as communities lack technology to *collect*, *process*, and *share* their available resources, as well as the resources in need.

🛠️ *Community Network Resource Mapping (CoNeReM)*

Community Network Resource Mapping software provides a big picture of the **supply**, **support**, and **aid** capacity and needs of a community, to support effective and efficient **collaboration**.

This project provides an **effective solution** to the lack of resources mostly **in emergency cases**.

Benefits

1. **Open access to resources** available in the community.
2. **Deploying resources** as **efficiently** and effectively as possible, **reducing waste** and **increasing utilization**.
3. Providing a big picture of the **capacity** to **prevent unnecessary actions** and **support collaboration**.
4. Increasing **social cohesion** by providing planned resource (a source of supply, support, or aid, especially one that can be readily drawn upon when needed.) deployment.

## 🍇 #I2We20 Team

- 👤 **Artem Pavlov** (https://devpost.com/artempavlovironman)
  full-stack developer
- 👤 **Fórika Endre (eapo)** (https://www.linkedin.com/in/forikaendre/)
  Information Architect, UI/UX, Community developement, Permaculture designer

- 👤 **Gyertyánági Endre** (http://nagymadar.hu/anima-tarsadalmi-es-kulturalis-innovacios-egyesulet#tagsagok)
  Non-profit, Sociology, Community developement, Projectmanager
- 👤 **Király István** (https://www.facebook.com/LaKing.D250Laboratories)
  full-stack developer, system developer
- 👤 **Pécsi Berci** (https://www.facebook.com/zellerede)
  Matematician, full-stack developer
- 👤 **Wigy** ()
  Mentor, DeCentral Budapest

✅ Features

It is a **bottom-up resource (a source of supply, support, or aid, especially one that can be readily drawn upon when needed.) mapping solution** done in an *independent* and *collaborative* way, with *anonymous data collection* and *secure information management*, which are key roles today! We are developing a **highly customizable open-source toolkit** for this.

(https://anima.d250.hu/)

It is a unique solution because of the use of *agile Sociocybernetic methods*, like highly customizable polls and data processing algorithms.

🤝 Call to Action

Join the *CoNeReM* app to map out your **community needs** and **available resources**. These can be any **supply**, **support**, and **aid** needed to support effective **collaboration**, especially relevant in *cases of emergency* (https://www.ecosia.org/search?q=global%20pandemic).

📢 It is our undisguised intention to

1. spread the *bottom-up approach* of problem-solving,
2. provide an open-source toolkit to communities, and
3. have more data collected (https://forms.gle/Ma92PzQWP2asmfNu6) to uncover real needs and induce real solutions.
